

Damien Reynot

438-763-2133 | dreynot@uwaterloo.ca | [linkedin.com/damienreynot](https://www.linkedin.com/damienreynot) | damienrynt.io/Portfolio

SKILLS

Softwares: SolidWorks (CSWA Certified), AutoCAD, MS Office, C++, MATLAB, Onshape
Manufacturing: Manual Machining (e.g. Mills, Lathes), 3D Printing, Power Tools
Engineering: GD&T, Tolerancing, DFM, Prototyping, Raspberry Pi, Arduino
Excellent hands-on problem-solving and technical analysis demonstrated through various optimization tasks
Strong bilingual (French) communication and autonomy developed through work experience and volunteering

EDUCATION

University of Waterloo Waterloo, ON
Candidate for Bachelor of Applied Science - Mechanical Engineering (Co-op) Sep. 2025 - Apr. 2030
• GPA: 3.9/4.0 (90%)
• Relevant coursework: Engineering Design, Material Struct & Props, C++ Programming, E&M, Mechanics

John Abbott College Montreal, QC
DEC - Honours Science Sep. 2023 - June 2025

EXPERIENCE

Mechanical Engineering Intern Jan. 2026 - Apr. 2026
Postalgia Ink Markham, ON
• Operated, maintained, troubleshoot and optimized **60 automated cartesian motion handwriting machines**, resulting in the efficient and reliable mass production of personalized mail
• **Designed** a collection system within constraints to preserve production sequence, greatly reducing sorting errors
• Proposed and implemented **system optimizations**, reducing error rates and mechanical issues across machines
• Communicated with team members to signal issues and communicate solutions, maintaining production efficiency

Aerodynamics Team Member Sep. 2025 - Present
University of Waterloo Formula Electric Waterloo, ON
• Participating in the **manufacturing** of the carbon-fiber aero package, including machining and carbon fiber layup
• Designed various 3D printed pieces, including jigs for lateral tie rod chassis tabs
• Conducted **R&D on mechanical joint methods** to join carbon fiber parts without damaging the fiber structure

Junior Analyst July 2024 - Aug. 2024
Lovepac Montreal, QC
• Made a statistical cash flow forecast in **Excel** based on customer and supplier payment habits
• Wrote internal procedures for the finance department in a formal, comprehensive and concise manner

Self-Checkout Attendant Sep. 2024 - Apr. 2025
Walmart Canada Montreal, QC
• Assisted customers and conducted interventions in a **fast-paced environment**
• Successfully managed 20 checkouts and processed thousands of transactions through the self-service area

PROJECTS

Automated Sauce Dispenser | 3D CAD (Onshape), 3D Printing, Arduino March 2025 - May 2025
• **Designed, 3D printed** and assembled a machine that automatically transfers filled sauce cups onto a plate
• **Wired and programmed** the **Arduino-based** electronic circuit for the robotic arm pushing the cups
• Conducted validation testing and iterative design improvements to enhance the dispenser's efficiency
• Collaborated effectively in a team to successfully develop a functional automated sauce dispenser

Formula Electric R&D – Joining Methods | R&D, Composites, Manufacturing Sep. 2025 - Dec. 2025
• **Developed and tested replaceable helicoil inserts** to join carbon fiber components, preventing the aluminum inserts lodged into the car from getting damaged and reducing the need to replace entire sections of the car
• 3D printed prototype parts corresponding to carbon fiber component geometries, then prepared **waterjet AutoCAD engineering drawings** and tapped aluminum inserts
• Performed **carbon fiber layup** over the prototypes, placing aluminum inserts into the parts and installing helicoil inserts into the cured assemblies
• Conducted testing on the prototypes to evaluate joint strength and performance over direct insert methods
